WHO ARE WE

In short, we are the guys that get the job done. Our goal at [Devtech Industries](#) is simple, to deliver services and products that not only gets the job done, but leaves our clients beyond satisfied, catered to their specific needs. **If it isn't done well, it wasn't done by Devtech Industries!**

We started our company with this goal clear in mind. Our approach to any project, big or small, is first to fully understand the clients need and then consider the best possible technologies and innovations to meet that need.

As a team holding over 20 years of experience in the Security Industry, we are proud to know that across all the projects [Devtech Industries](#) has shouldered, we've stayed true to this goal and continue to strive towards always giving nothing but the very best.

Networks

We have found over the years that most of the site problems always point to poor planning and network implementation. That is why we strive to supply you with the most advanced network analysis and diagnostic software and hardware.

Access Control

When our client requires assistance with a new system we will be on hand to design, manage and consult wherever we are required. This might include but will not be limited to features like Access control, Time and Attendance, Site assessments, Maintenance,

CCTV

We will be able to assist you with the design, development and wellbeing of your system. Our solutions will contain options based on needs from clients. Examples would be WDR – Required in bright areas. Lenz options – To cover the great distances as well as the macro shots. Camera models – PTZ for when you need to have a camera moving without any input. Video compression, Storage calculations, IVA, People counting, LPR. These are just a small list of what is available on the market today.

A photograph of a server room with rows of server racks. The scene is dimly lit with a strong blue color cast. The racks are filled with server units, and some have indicator lights. The perspective is from a low angle, looking down a long aisle between the racks.

SOLUTIONS & PRODUCTS

SOLUTIONS & PRODUCTS

Software Commissioning

We pride ourselves in being thorough and precise in what we do. When it comes to software commissioning, you can rest assured knowing that all systems will operate smoothly once we are done.

Commissioning is the process of assuring that all systems and components are designed, installed, tested, operated, and maintained according to the operational requirements of the owner or client.

Intrusion

With the latest smart security systems, you can have peace of mind knowing that your premises are secured and in you being able to access and control the various detectors through your smartphone from anywhere around the World.

Project Management

With over 20 years experience between our skilled professionals, we have learned and mastered the most important aspect of project management - to achieve all of the project goals within the given constraints. True, at times these constraints can prove to be a challenge, but it's a challenge we haven't and don't plan on failing.

All our projects we approach with meticulous planning and oversight to ensure the project is completed on-time, within budget and to the clients' complete satisfaction.

Products We've Worked On:

- Tyco Products (Fireclass, DSC, Kantech Entrapass, Exacqvision, CEM AC2000)
- Bosch (Fire, Access, CCTV)
- AXIS Certified
- Milestone (MCDE, MCIT, MCIE)
- UNV (IPSAN, EZstation, CCTV)
- Impro (Portal, IXP400, IXP220)
- Gallagher
- Dell (Networking, Servers, Storage)
- Supermicro (Servers, Storage)
- Assa Abloy wireless locks
- Ubiquity (Wireless networks, Switches)
- Netscout (Network diagnostic tools)
- VisionHub (Nicevision CCTV)
- Alarm Systems (AJAX, Pima, IDS, Paradox, DSC)
- JVA Electric fence units
- Traka Key Management
- Juka 614 Full Body X-ray Machine (Diamond, Platinum, Gold and PGM's) detection.
- Any 3rd party integrations
- On site operator training and processes implementation.

Our services are not limited to these products as we stand willing to expand our knowledge and expertise to match your needs. With site visits we will be able to completely assess your needs and determine the perfect solutions.

We will be able to assist you with maintenance as well. This focusses on server database maintenance, software preventative maintenance and monthly maintenance contracts.

Physical hardware can also be maintained with hard drive replacements, server health checks and part replacement on any faulty or broken hardware. Tier 1, Tier 2 and Tier 3.
