WELCOME

COMPANY PROFILE

Devtech Industries specializes in providing and maintaining technology solutions, security systems and electrical services. Our expertise covers a wide range of areas, from computer systems and network setups to designing and implementing security measures and electrical installations.

We cater to various needs, including setting up powerful servers, managing data centers, installing essential software, and providing ongoing support. We also handle security aspects like access control, CCTV camera, and time tracking systems.

WHO ARE WE

In short, we are the guys that get the job done. Our goal at [Devtech Industries](#) is simple, to deliver services and products that not only gets the job done, but leaves our clients beyond satisfied, catered to their specific needs. **If it isn't done well, it wasn't done by Devtech Industries!**

We started our company with this goal clear in mind. Our approach to any project, big or small, is first to fully understand the clients need and then consider the best possible technologies and innovations to meet that need.

As a team holding over 20 years of experience in the Security Industry, we are proud to know that across all the projects [Devtech Industries](#) has shouldered, we've stayed true to this goal and continue to strive towards always giving nothing but the very best.

SOLUTIONS & PRODUCTS

Networks

We have found over the years that most of the site problems always point to poor planning and network implementation. That is why we strive to supply you with the most advanced network analysis and diagnostic software and hardware. We offer solutions ranking from office networked printers, scanners to data and internet connections.

Access Control

The primary objective of access control is to mitigate the potential for unauthorized entry into both physical and digital systems, thereby enhancing security measures.

When our client requires assistance with a new system we will be on hand to design, manage and consult wherever we are required. This might include but will not be limited to features like Access control, Time and Attendance, Site assessments, Maintenance, Installations, Consulting, Upgrades, Database maintenance, Upgrades and integrations.

CCTV

Closed-circuit television (CCTV) involves the utilization of video cameras to transmit signals to a predetermined location.

Video transmission can be accomplished through various methods, including point-to-point (P2P), point-to-multipoint (P2MP), as well as mesh wired or wireless connections. CCTV surveillance proves instrumental in crime resolution and, notably, in real-time monitoring of multiple areas. This capability allows for immediate response and informed decision-making when incidents occur.

Intrusion

Our cutting-edge intrusion systems are meticulously engineered to provide vigilant surveillance of your premises. In the event of an unauthorized intrusion, they promptly trigger an alarm, simultaneously notifying your trusted neighborhood security watch company. Leveraging the latest advancements in smart security technology, our systems offer you unparalleled peace of mind. With remote accessibility via your smartphone, you can seamlessly oversee and manage various detectors from any global location.

Electrical & Solar

With our electrical expertise, we are able to assist with repairs, maintenance and installation of electrical systems and solutions. Our electricians are Red Seal Qualified and experienced in domestic, commercial and industrial electrical services.

Our team is also experienced in Solar/Back-up power solutions up to 100kva. We only use trusted products to ensure your system has no downtime or breakdown.

SOLUTIONS & PRODUCTS

Software Commissioning

Software Commissioning is the rigorous procedure through which we guarantee that every element and system is not only meticulously designed and installed, but also subjected to exhaustive testing, ensuring it operates in strict accordance with the precise operational standards specified by the owner or client. Our organization holds an unwavering dedication to exacting standards and precision. When it comes to software commissioning, you can trust that upon completion, every facet will function seamlessly and reliably.

Project Management

Benefiting from over two decades of collective expertise among our accomplished professionals, we have honed a crucial facet of project management: the ability to realize all project objectives within defined constraints. While we acknowledge that these constraints may present formidable challenges, they are challenges we have consistently met and intend to continue conquering. Each project is accompanied by a meticulous process of planning and vigilant oversight, guaranteeing timely delivery, adherence to budgetary parameters, and the utmost satisfaction of our clients.

SLA Maintenance

Regular maintenance is an integral part to ensure that any system functions optimally. With an SLA in place, we offer only the best service on maintaining and repairing systems that fall within our scope of work. An added benefit is short turnaround times on call-outs. At the end of each visit/month, a report is sent to the client, leaving the client with peace of mind and knowing exactly what the status of the system is.

Custom Design & Integrations

When it comes to security, one size doesn't fit all. We offer custom integrations on various systems to accommodate the needs of each client.

Custom Integrations, Design and Development include, but aren't limited to, Time and Attendance integration with Access Control System and HR Data.

Server/Control Room Build

Both a Server and Control Room are crucial departments in any company. These departments should function optimally 24/7. Within our team are experienced team leaders that know how to design the best solution and get an existing server and control up to industry standards and function at its best.

Products We've Worked On:

- Tyco Products (Fireclass, DSC, Kantech Entrapass, Exacqvision, CEM AC2000)
- Bosch (Fire, Access, CCTV)
- AXIS Certified
- Milestone (MCDE, MCIT, MCIE)
- UNV (IPSAN, EZstation, CCTV)
- Impro Technologies (Portal, IXP400, IXP220)
- Gallagher
- Dell (Networking, Servers, Storage)
- Supermicro (Servers, Storage)
- Assa Abloy wireless locks
- Ubiquity (Wireless networks, Switches)
- Netscout (Network diagnostic tools)
- VisionHub (Nicevision CCTV)
- Alarm Systems (AJAX, Pima, IDS, Paradox, DSC)
- JVA Electric fence units
- Traka Key Management
- Juka 614 Full Body X-ray Machine (Diamond, Platinum, Gold and PGM's) detection.
- Deye Inverters
- Schneider (Electrical & UPS)
- ABB (Electrical, AC Drives, etc.)
- 3rd party integrations
- And more...

In addition to our current offerings, we are committed to continually extending our knowledge and capabilities to meet your specific requirements. Through thorough onsite evaluations, we gain a comprehensive understanding of your operational needs, enabling us to recommend tailored solutions.
